SUMMARY

I am a Front End Developer with 7 years of rich experience in developing Web Applications using Angular in Agile environment. Apart from web development I have also worked on Content Management Systems using Oracle WebCenter Sites. Currently I am a Lead Engineer working on consulting US Insurance Giant in enhancing, maintaining and upgrading digital products.

EXPERIENCE

Accenture

Oct 2015 – Present

Mumbai, India

Application Development Team Lead

Jun 2021 – Present

- Role: Senior Developer
- Working as an SME (Subject Matter Expertise) in Angular and participated in work activities with various team guiding them in upgrading and maintaining websites using Angular.
- Worked on Angular version migration. Did 3 migrations over the span of 6 months.
- Worked on multiple projects with a goal of improving performance of applications by introducing concepts like Lazy Loading, SCAM component model, State Management, fixing memory leak problems in Observables.
- Conducted multiple boot-camps and training sessions within Accenture to cross trains folks on Angular.

Application Development Senior Analyst

Dec 2018 – Jun 2021

- Role: Developer
- Worked on upgrading 5 legacy websites (written with JSPs and JSFs) to Angular over that span of 3 years.
- Actively participated and contributed in designing the development path of migrating websites.
- Worked on creating Components, Templates, Directives, Pipes, Forms (Reactive & Template), Services and State Management using NgRx.
- Designed Reusable components and Dynamic Components.
- Worked on improving code coverage to 80% and above using Karma and Jasmine.
- Worked on improving Web Accessibility.
- Lead a team of 3 Junior Developers.

Application Development Analyst

Dec 2016 – Dec 2018

- Role: Developer
- Worked on Content Management System using Oracle WebCenter Sites Assets.
- Worked on Web Services to manage flow of data between Oracle WebCenter Sites and Database using Java, JSP, Servlets and MySQL.
- Worked on WordPress Admin UI to handle posts, comments and implemented POC on recommendation using dynamic widgets
- Migrated 5 websites that were using manual CMS to OWCS over the span of 2 years.
- Created a tutorial guide on OWCS and open sourced that to community.
- Trained junior resources on Agile Methodology, Oracle WebCenter Sites and WordPress Admin UI.

Application Development Associate

2015 – Present

- Role: Junior Dev.

- Worked in an Agile environment on user stories involving work using HTML 5, CSS 3, JavaScript, jQuery and Bootstrap 3.
 - Hands-on building flex assets, basic assets, segments, attributes and recommendations in Oracle WebCenter Sites 11.1.1.8
 - Worked on POCs to demonstrate specific behaviour using Java 8 and REST Web Services
 - Received a brief training on agile work process and Oracle WebCenter Sites 11.1.1.8
-
